## Dogmatic - Newsletter of Hawke's Bay Dog Training Club Inc.

---

### Greetings,

Welcome to the last issue of Dogmatic for 2022.

It's been so busy with lots happening since the August issue. We've had an Agility Ribbon Trial, an Obedience Champ Show, a Scentwork Trial, a CGC Assessment and we have our Agility Champ/Jumpers/Games show - our biggest show of the year coming up 19/20 November and these are just the in-house shows.

This year both the National Dog Obedience Assembly (NDOA) and New Zealand Dog Agility Championship (NZDAC) were held over Labour Weekend. So there's all sorts to catch up on inside. Our members did us extremely proud at the Nationals and came back with prizes and ribbons galore. Well done Teams HB!! Some members are a little shy of posting their results in Dogmatic - but I do post all Club members competition results on facebook so check our FB page on a regular basis.

Classes have run throughout the year (when permitted under Covid rules) and we need to thank our instructors who give up their time and share their expertise with Club members - so a big thank you to: Robyn (Mondays - RallyO); Dee and Chrissy (Tuesdays - Agility); Dionne, Maria, Heather, Chrissy and Karen (Wednesdays - Domestic Obedience & CGC); Maria and Dionne (Thursdays - Scentwork) and Flygility (days vary - Chrissy).

If you're at a loose end - the agility crowd will be down at Farndon Park, Clive over the coming weekend (19/20 Nov) and some of our competitors rank among the best in the country - so come down and have a look see. Its well worth it and you never know - you might get the urge to join in our addiction.

Christmas is coming (our break-up is Wednesday 14th December ) - do come along and have some fun and games and some snacks. And to those who can't make it - enjoy the Festive Season. **Finally, this year's fundraising raffle tickets are on sale and Countdown vouchers are the prizes \$150 for 1st, \$100 for 2nd and \$50 for 3rd - our sincere thanks to Countdown for supporting the Club.**

**Cheers  
Jackie**

facebook**

## President's Report

Our yearly Championship Obedience Show was held in October. We found this year's event was a lot easier to run than last years, as we enjoyed having no restrictions due to Covid 19 regulations. Like past years ....Freedom! Our entries were down slightly this year possibly because the dates for our show were changed, which unfortunately seemed to clash with other events.

I really would like to say a huge big thank you to our very small team of dedicated helpers over the weekend. I'm sure they all slept really well and were knackered by the end of it ...I know I just crashed every night. This is one of our major events of the year and it takes a lot of hard work behind the scenes to make these events run smoothly.

I would also like to give special thanks to our generous sponsors, Pro Plan. Who supplied us with their amazing products for our Show Prize Winners and we are very grateful and lucky to have them on board.

Many thanks too to Ezeleash and Seeds and Grains as our valuable Ribbon Sponsors. As a club we really need to do our bit and support our sponsors!

Our Agility Ribbon Trial was held on the 4th September with Club Members having great results. Congratulations to everyone. Unfortunately, I could not make it to the event to give a helping hand, but going by the photos, everything was under control and it looked like everyone had a great time.

Last week, Lorraine represented us at NDOA in Auckland with some really great results, including winning the Advance RallyO as Team Dog with Tempo. Lorraine's daughter, Kristina also travelled to Auckland and had great results. I'm sure there was no room in their car on the way back home with all the prizes they won. Well done! I know how chuffed you are with these results.

In the same week four of our club members made the huge hike to Christchurch to compete with their dogs at the NZDAC. Sharon, Heather, Chrissy and Dee they too had some amazing runs with varying results and lots of Ribbons.

Thanks guys for making the effort and representing our Club.

I am hoping by now you would have received some of our Christmas Raffle Books. The profit from these sales support our Club and help our members when they represent our club at National Shows like NZDAC and NDOA.

We have changed the prizes up this year to Countdown Supermarket vouchers. So handy to have at this time of year. We need your help to sell these tickets so please ask your instructor. They are not expensive at all as they are \$2.00 per ticket or a book of 3 for \$5.00. Don't forget our Christmas Break up on the Wednesday the 14th December at Club Grounds. It will be a fun night with some games and treats for the dogs as well as a buffet for the handlers. So, if anyone has some games that they would like us to include just let me know, as I would love to try something new!  
Thank you.

## Agility Report

Greetings,

Agility members have been in fine form at competitions since my last report in August. Local shows included our Ribbon Trial and Central Hawkes Bay Champ show which was attended by everyone.

Chrissy, Heather, Sharon, Cam and I made the journey down to Christchurch to compete at NZDAC (nationals) and achieved success, apart from Cam who was judging and managed an injury the day before the show started of course! The ladies all managed placings and a few wins, and we all qualified for a finals.

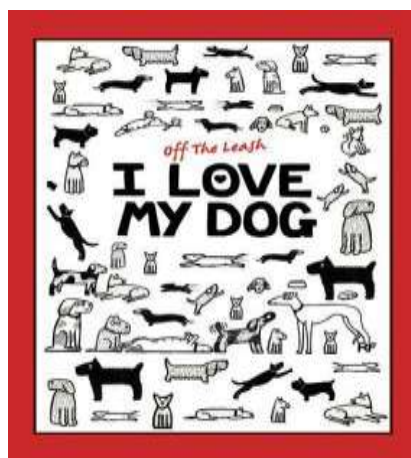

Ruby and I also represented our Zone (2) in the InterZone Intermediate class and managed a decent clear and a 2nd place. Overall the show was run exceptionally well, the weather played nice, and the onsite bar took a lot of my money! We look forward to next year's nationals hosted by Zone 1 in Morrinsville.

Coming up (19/20 Nov) our biggest show of the year will be held in Clive. It is always incredibly hard to run this show with a small membership base in the usually hot weather. If you are around we would greatly appreciate an hour or two of your time over the weekend to pitch in. (I hear rumours that the ice-cream man is coming back, what more could you want!). Spectators are always welcome and competitors travel from all over the North Island to attend this show so there will be real talent on display.

I guess we are now heading into that time of year where I need to wish everyone a Merry Christmas, I hope you all have a restful and well earned break with your doggos and families and look forward to what 2023 brings.

Cheers

Dee

## Our Agility Events

**19 / 20 November 2022**

Agility Champ Show (CAE)  
Venue: Farndon Park Clive

**22 / 23 April 2023**

Hawke's Bay & Napier -  
Jumpers Champ Show (CJE)  
Venue: Napier DTC

## Obedience Report

This term is well under way with the Puppies Class and Domestic 1 Class completely full. It is so great to see such a diverse bunch of people with a large range of dogs wanting to learn - and so rewarding, as an instructor, to see everyone making progress and enjoying their dogs.

We held our Triple Championship Obedience Show on the 8<sup>th</sup> and 9<sup>th</sup> of October. This year we had quite a few new faces at our show with those travelling up the Island to head to the NDOA in Auckland. It was lovely to hear, we had lots of compliments from all around regarding the way we run our shows and lots of praise for our sponsor Pro Plan who supplied us with great big Bags of biscuits for each winner.

I only wish I could have been one of the lucky ones that received a bag. We also had our sponsors sponsor our ribbons which always look so professional with their company names printed on them.

Our ladies who ran the kitchen did a wonderful job, especially feeding our judges and coping under pressure when everyone wanted their toasted sandwiches at once.

I really want to give a big thank you to our small team of helping hands who worked so hard over the weekend. Everyone chips in including those that helped set up the rings, the kind people who donated the food that was used in our kitchen and those who provided the prizes for the raffle. All of this combined effort makes our shows run so smoothly. Thank you 😊

Isn't it great to see that the days are getting longer giving us all more daytime to enjoy our four-legged friends. With longer nights comes the dreaded Barley Grass Season.

Barley grasses are very dangerous due to their design. They have backward facing barbs that enables the seeds to easily migrate forward causing the seeds not to back out again. They are capable of invading your dog's body through their feet, ears, eyes, mouth, or in fact, any of their body surface.

You should thoroughly examine your pet regularly and pay special attention to their feet pads and ears. Signs to watch for are excess licking or your dog shaking their heads trying to dislodge stuck seeds. Check for any abnormal holes and if you see any please take your dog to your vet immediately and these can become quite nasty rather quickly.

Thank you to our awesome team of Obedience Instructors, Chrissy, Heather and Maria for doing such a great job teaching our classes and my right-hand helper Karen with all her help. These ladies give up their valuable time, sometimes even taking more than one class on different nights in all sorts of weather.

Have fun with your dogs, they truly are amazing creatures.

Cheers  
Dionne

## RallyO Report by Robyn Fargher

RallyO continues to be popular with a group of our club members. We are always happy to have more people to come and have a look.

We continue to have a lot of dogs competing in the monthly RallyO link competitions with some great results for the year. It is great to see our newer participants doing so well. We are also running a monthly qualifying competition where you can earn qualifying certificates for your dog. People can also earn versatility qualifications from their monthly link results which can earn your dog more titles.

We have the monthly competition on the first Monday of the month, and training on the third Monday of the month, with the qualifying evening varying from month to month. Feel free to come along and have a look to see what's involved. Email me [rfargherk9s@gmail.com](mailto:rfargherk9s@gmail.com) if you wish to be added to our RallyO email list.

I am delighted to announce our club's first recipients of the NZARO Versatility Novice (VN) awards. Wyn, Shuffle and Astro have all achieved Versatility Novice with 6 scores of 90 or better on STD NALA/NZARO courses with one on 95 or above since April 2022. This award is within reach of most of our RallyO members. They just need to complete a couple more courses.

## ScentWork Report by Maria Noanoa

Hi it is time for our latest newsletter. I have to say we held our trial in September and it was great. We had two days of it with two great venues. The weather was beautiful as well. On the Saturday we held an Advanced class and then an Intermediate at Twyford school. On the Sunday it was Novice held at Ellwood Rugby Club. It was really good getting these two venues and it was really appreciated. There were very good numbers at our event and it's a growing sport.

Last weekend there was another trial in Palmerston North at the racecourse there run by Kenson K9. They ran an Intermediate and a Novice. Used four Judges for both trials so each element was done one after the other. It was fast getting through the competitors and the weather played nice and stayed warm for us. No rain.

Congratulations to our Members who passed Intermediate:

Dionne with Piper; Maria with Reba; Sandra with Nahla and Jonna with Ani.

And Kaye with Molly in Novice. Chris with Taku just missed out but she came home with the Judges award!

Classes are on a Thursday night and we go to different places when we can. If anybody is interested get in touch with Maria 0210628316.

## Canine Good Citizen (CGC) Report

The CGC classes have been training every Wednesday when the weather has allowed! We have been out and about around town enjoying a variety of settings.

The work we have been doing really showed on Saturday November 5<sup>th</sup> when we hosted a silver/gold assessment at the racecourse with Vicky Graham (Assessor) coming down from Taupo for the day.

Seven dogs and handlers attempted the silver assessment and of those 3 passed - all from our club! Congratulations to:

Kay Glasgow and Molly

John Carbin and Lusi

Chrissy Harris and Betty

This is a huge achievement, the silver assessment has a number of exercises that take a lot of training and no CGC qualification is a given!

One team went on to attempt Gold and passed! Well done to Chrissy Harris and Betty

The assessment went very smoothly, thanks in a large part to the helpers who came along on the day. Thank you to all our volunteers who make these days happen.

Next year is not far away and we will have a Foundation assessment to look forward to.

Enjoy the Christmas New Year season with your dogs and families.

Chrissy Harris  
CGC co-ordinator

## Flygility Report

The flygility group are getting consistent results with the monthly NALA link competition, our dogs really love doing fly!

We are always on the look out for new people and their dogs to join this fun sport. If you have a fit dog that adores tennis balls and loves to run, this may be the game for you. The dogs run a course 32 metres long with jumps and tunnels, get a ball out of the flybox and return to the handler.

We compete against the clock in NALA and race against other dogs in competitions.

Contact the club if you would like to find out more about flygility.

## Vet Report-Nicky Chadwick (Animal Care 2002 Ltd)

### Common Household Items that are Toxic to Dogs

#### Chocolate toxicity

Chocolate contains two ingredients that are toxic to dogs in sufficient quantities – Theobromine and Caffeine. These are both stimulants called xanthines, that humans can break down and excrete much more efficiently compared with dogs. So thankfully, we can eat large amounts without too many ill effects.

As a rule of thumb – the darker the chocolate the higher the level of xanthines are present. Cocoa powder and cooking chocolate are therefore the most toxic to dogs, followed by higher percentage chocolate, then milk chocolate. White chocolate contains minimal xanthines so is relatively nontoxic – however high levels of fat and sugar can cause other complications in your pet such as pancreatitis, so should be avoided.

It is possible to calculate the likelihood of your pet becoming unwell after eating chocolate by using a chocolate toxicity calculator – which can be found online with an internet search. You will need to know the weight of your dog, the type of chocolate, and the weight of the chocolate that your dog has eaten.

Obviously, your dog may be ok after consuming a larger amount of milk chocolate (250g for a 10kg) but may become critically unwell after only eating a very small amount of cocoa powder (8g for a 10kg dog).

There also seems to be an individual sensitivity with some dogs being more susceptible to the toxic effects of chocolate.

Xanthines directly affect the nervous system and the cardiovascular system therefore some of the clinical signs we can see are:

- Vomiting and diarrhoea
- Excessive thirst and urination
- Hyperactivity/restlessness
- Lack of coordination
- Muscle tremors/shaking and seizures

It is important to contact your vet immediately if you suspect your dog has eaten a toxic amount of chocolate or is showing signs of toxicity.

Treatment: If your dog is seen by the vet within the first 1-2 hours your vet will induce vomiting to prevent the toxic effects, as there is no specific antidote.

Activated charcoal is then often administered to your dog as this binds to the toxin, and prevents it being absorbed from the intestinal tract. If your dog is already showing signs of chocolate toxicity, treatment is symptomatic and is aimed at controlling the seizures or tremors, medication to control the heart rhythm, drugs to prevent vomiting, and intravenous fluids to flush out the xanthines from the system. Xanthines are slowly excreted from your dog's body so your dog's clinical signs may persist for 72 hours.

## Allium species Toxicity

The Allium spp. include onion, garlic, chives and leeks which produce sulphur containing compounds which dogs (and cats) cannot effectively digest. High levels of these sulphur compounds cause oxidative damage to the red blood cells. This weakens their membranes and shortens the life of these vital oxygen carrying cells. If enough red blood cells are destroyed your dog will become anaemic and the body is starved of oxygen. The number of cells damaged is dose dependent, but small amounts fed over a period can lead to problems due to a gradual reduction in red blood cells. In general, toxicity is consistently noted when dogs eat over 0.5% of their body weight of onion at any one time (50g for a 10kg dog). Garlic is approximately 3-5 times more potent. Clinical signs can start in as little as 24 hours after ingestion but usually occur around 3-5 days.

Clinical signs we expect to see are:

- Weakness and lethargy, leading to collapse
- Breathing difficulties
- Pale gums
- Increased heart rate
- Not eating
- Dark urine

Treatment: If ingestion is recent, then your vet will induce vomiting to prevent symptoms and administer activated charcoal to reduce absorption from the intestinal tract. However, if your dog is already showing signs of toxicity then he/she may need a lifesaving blood transfusion, oxygen supplementation, intravenous fluids to protect the kidneys and hospitalisation to save their life.

## Grape/sultana/raisin Toxicity

It is still unclear which component of grapes and raisins makes them so dangerous to dogs. However, they contain a toxic compound that can irreversibly damage our dog's kidneys.

There also seems to be an individual variation between dogs as to how many grapes or raisins they can eat before we see toxic effects. Some dogs can show signs of kidney damage after only consuming 2 grapes per kg of their body weight.

Clinical signs usually begin after 72 hours of ingestion and can include:

- Vomiting and diarrhoea
- Lethargy
- Off food
- Increased thirst
- Abdominal pain

Treatment: if you know that your dog has eaten grapes/raisins then call the vet immediately. Your vet will induce vomiting if the ingestion was within the last 1-2 hours and administer activated charcoal to prevent further absorption from the intestinal tract. If your dog is already showing signs of kidney damage, then they will require lengthy intensive hospitalisation with intravenous fluids and supportive drugs. If kidney damage is very severe your dog may need ongoing treatment or may not survive.

## Xylitol Toxicity

Xylitol is an artificial sweetener found in many sugar free products such as gum, lollies, drinks, peanut butter, toothpaste and dental floss. In dogs, unlike humans, xylitol stimulates a dose

dependent release of insulin from the pancreas. This can result in a rapid lowering of our dog's blood glucose which is called hypoglycaemia. This often happens within an hour of ingestion but can be delayed with slower absorption from some gum products.

With consumption of larger doses of xylitol, the liver can also be damaged. Clinical signs we can see associated with 'hypoglycaemia' are:

- Weakness
- Vomiting
- Lack of coordination
- Tremors, seizures, coma.

Signs associated with liver disease can be:

- Vomiting
- Off food
- Yellowing of the eyes/gums/skin
- Severe lethargy

Treatment: If your dog has only just eaten the product and has no clinical signs, your vet may induce vomiting. Activated charcoal does not bind to xylitol so is usually not given. Once signs of hypoglycaemia are present your dog will need prompt treatment with intravenous glucose to correct the blood sugar for up to 24 hours. Your vet will also need to monitor for signs of liver disease which will be treated accordingly. With mild liver damage your dog may make a full recovery, however if your dog has eaten a large amount of xylitol and liver damage is severe, it may prove fatal.

## Macadamia Nut toxicity

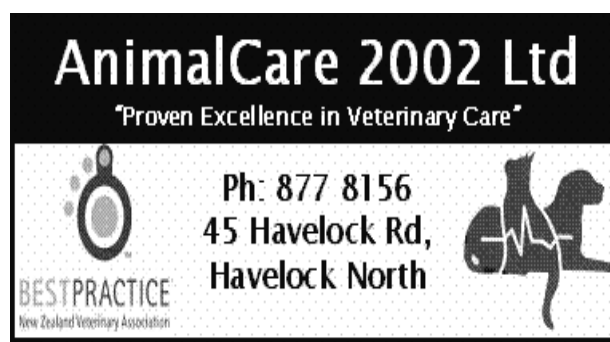

We still do not understand why macadamia nuts are toxic to dogs. Some dogs have shown toxic effects after only eating 1 nut per kg of body weight, whilst others can eat many more with no ill effects.

Clinical signs are usually seen within 12 hours of ingestion and include:

- Vomiting
- Weakness and a staggering gait
- Tremors
- Fever

Treatment: If your dog has eaten a potentially toxic amount of macadamia nuts, then your vet may induce vomiting followed by the administration of activated charcoal to prevent further absorption from the intestinal tract. If your dog is showing clinical signs, then treatment is symptomatic involving intravenous fluids to help excretion, drugs to stop vomiting, drugs to help with the fever and drugs to stop the tremor. Most dogs recover without further complications over 48 hours.

## **IMPORTANT HEALTH AND SAFETY NOTICE**

Racecourse Management has asked me to remind our members about how their health and safety requirements affect our Club.

The racecourse is a work place so there are potential hazards to be aware of namely tractors, vehicles and racehorses. Because of this the Management have asked that we observe the following rules

- **NO dogs or people** on the course or in the Grandstand before 11am - as this is the time when there are horses in training.
- **All dogs** on leads during working hours (11am to 5pm) because there are people and tractors working during these hours .

The Management has no problem with Club members exercising their dogs off lead after 5pm before class but asks for consideration if there are tractors working - no one wants dogs or people injured.

**Always pick up after your dogs and don't forget to take it away with you we don't have a bin service!**

We are lucky to have this area to exercise our dogs - please respect it.

## **Dog training, home based day care, lifestyle block and pet minding**

Based in Otane CHB

Positive science based  
training using fun,  
games and tricks

## AGILITY NOTICES

### EQUIPMENT AND TRAINING

Just a reminder to everyone to make sure you assist with getting the agility equipment out and putting in away. Best way to ensure you do remember is to arrive for your class 15 minutes before it's due to start i.e. 5 pm for 5.15pm for Foundation; and so on. And though we all want to get home - just check before you leave what needs to be put away or moved.

### GEAR BOOK

So we can keep track of the gear, there is a Gear Book hanging up on the notice board, it must be completed by any **Agility** member who wishes to borrow equipment. **Maximum loan time - two weeks.** It must be dated, have the name of person borrowing the equipment, the equipment borrowed, signed by borrower and **countersigned by a committee member or instructor.** Note on occasion it may not be possible to borrow gear as it may be required by us or another club - please don't be offended if your request is refused.

### Agility Link

A reminder to club members that we run agility link each month, normally on the first Tuesday of the month. We run all three classes of agility link – Standard Agility, Games, and Veterans.

The club continues to do well in all three classes, but we would love more people to join us.
