Dogmatic - Newsletter of Hawke's Bay Dog Training Club Inc.

Greetings,

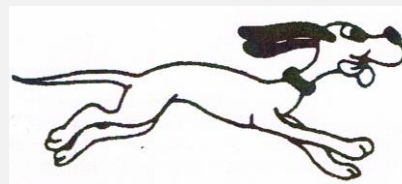

Great to finally have the opportunity to produce another edition of Dogmatic. I'll start by referring you to page 2 – right hand column for details of the new Committee. After 13 years, Heather has stepped down from the Club Secretary's role and Sarah has stepped up. Dionne's term as President expired and Dee has been voted in as President. Heather and Dionne, your contribution to the Club has been phenomenal, thank you. Thanks too to both Dee and Sarah for stepping up!

Well, lots has happened, and lots is happening in the next few months... We managed to hold a few shows – April, the Jumpers Champ, July, Agility Games Champ and September, Agility Ribbon Trial. In October there is the Obedience Champ and November has a Rally0 and Agility / Jumpers Champ – details of dates and venues are given inside.

Both NZDAC (Agility) and NDOA (Obedience) nationals are coming up in the next couple of weeks – so our congrats to Heathe & Sookie (reserve team dog, Novice / Zone 2) and Lorraine & Mighty (team dog Rally-O / Central region) – good luck ladies!!

Of course, we are also fast approaching Christmas and our fun break-up evening so make sure your instructor keeps you informed and sells you some of our great raffle tickets.

Have lots and lots of fun with your dogs.
Cheers Jackie

Club Dates 2023/24

**Annual General Meeting
Held – 22 August 2023**

Term Dates

As term dates for Agility and Obedience may differ, they are now provided in their respective sections.

**Xmas break-up
To be confirmed**

Outgoing President's Report – AGM

Well, I had hoped that this year we would get through without another disaster such as a pandemic but then we got hit with Cyclone Gabrielle which has had devastating impact on our Region and beyond. Our thoughts are with those who are still having to deal with this, some of whom are still recovering and rebuilding ...surely 2024 will be better!

We were very fortunate to receive a considerable donation from the Agility Benefit Show, held to raise funds for all four East Coast Clubs: Gisborne, Hawkes Bay, Napier and Waipukurau. I would like to acknowledge all the effort and hard work from the Agility Team, particularly Robyn Fargher, who worked with the DNZ Agility Committee for this truly appreciated event.

Over this last financial year all our shows have had numbers down. This is not due to people not actually wanting to attend but simply due to either a clash of dates or because of these terrible weather interruptions, with main roads into areas being closed. Let's hope next year sees a change. Even when the numbers are down, to put the show on still takes the same amount of work so again, A big thank you to all involved.

We have been very lucky this year to have a new sponsor on board, Naturally Pets. They are helping us and are wanting to promote with us the brand Taste of The Wild, their motto being "Your pets crave a taste of the Wild Go ahead and give them one". The main benefit from this product is that the first ingredient is real meat, fish or fowl. Please check them out at your local vets or your pet store. We need to support our sponsors.

The recent traffic flow from Napier to Hastings and vice versa has been slow and congested and has affected our Classes, with people deciding not to travel, which is understandable. We have had to adapt classes with the numbers attending up and down from week to week. On saying that, our obedience classes are all ways booked in advance with a waiting list.

Finally, I'd like to say a massive thank you to the Committee for their support and commitment to HB Dog Training Club. There is a lot of work that goes into coordinating classes and shows. The time and effort, no matter how big or small the contribution, our wonderful volunteers ensure the smooth running of our Club. I encourage other club members to become part of our wonderful Committee - any amount of help and support goes a long way to ensure success for your club. Please reach out.

I have enjoyed my time as President but feel it is now time for me to step down, focus on other areas and hand the reigns over to a new President.

Thank you again. Dionne Robinson

Agility Report by Dee Ockey

Hi agiliteers,

We ran our first Games show in July and well it started with a hiss and a roar, it then quickly ended in a roar of rain on Sunday, so we had to cancel. However, the general reception of the Games was well received by local competitors, and we will be able to reattempt it next year and hope for better weather.

The Dogs NZ Agility Committee hosted its first Agility Clubs' Conference in August where one member from each club attended. Some clubs presented how they structure their training classes and shared some fantastic ideas. I was the HBDTC delegate and came away very inspired to make changes.

Competing members are currently busy bees on the lead up for our national championship show (NZDAC) to be hosted in Morrinsville over Labour weekend. I want to wish those members travelling up the best of luck and know they will represent our club to the best of their abilities and have a great time doing so.

Obedience Report by Dionne Robinson

This third term has been a smooth ride really, as the weather played ball for most of the time and, we finally had a term with not needing to re-organize our place of training.

It was nice to see another great bunch of dedicated owners out there on these dark winter nights, all for the love of our dogs.

On the 29th and 30th of September we are holding our Annual Championship Obedience Show.

This is a big show for our club and again we will be asking you for help either in the kitchen, bringing food or goods for the raffle, or a helping hand on either day. The show is always good fun and are a nice way to meet like-minded people that share the same interest ...dogs.

If you can help us in any way, please talk to your instructor.

We have been lucky to have Nora helping Maria out this term. It makes the whole night run better. Thank you, Nora.

I would like to personally thank our hard-working team Maria, Heather, Karen and Kay for taking our Obedience Classes and turning out at nights for week after week. well done team.

Have fun with your dogs, aren't they amazing creatures?

Cheers
Dionne

Scentwork Report by Maria NoaNoa

Hello. Gosh the time suddenly seems to be flying by. Before we know it, Christmas will be here.

I really don't have anything to report as we have not been able to hold a trial. Its very hard to get a venue which will allow dogs, especially as we need room for Interior, Exterior, Containers and Vehicle.

Put your thinking caps on people for ideas please. On a brighter note the better weather is here and more daylight so we can go more different places for training. Yay

So far, the following members have passed the number of tests at the levels identified:

Augusta Grayson	Storm	2 Novice
Chris Ross	Taku	4 Novice
Dionne Robinson	Indie	4 Intermediate
	Piper	5 Intermediate
Essam Girgis	Coco	1 Intermediate
Jonna Gibson	Ani	2 Intermediate
Kay Glasgow	Molly	2 Novice
Maria Noanoa	Brandy	4 Intermediate
	Reba	2 Intermediate
Sandra Dunsheath	Nahla	2 Intermediate

If you are interested in doing Scent work at all just ring or txt MARIA on 0210628316 anytime

Rally-O Report by Robyn Fargher

We normally meet two Mondays a month with the Rally-O link course now normally being run on the second Monday of the month. Feel free to come along and have a look to see what is involved.

Our dogs have been doing very well in the monthly NZARO Rally-O Link competitions. Runs count towards Awards if they score 90 or above.

Versatility Novice

Jill Anderson - Kiri
Mary Cullen - Lexi
Jacky Carbin - Luna
John Carbin - Lusi
Robyn Fargher -Tigger

Versatility Novice Bronze

Dionne Robertson - Indy
Dionne Robertson - Piper
Chrissy Harris - Lace
Chrissy Harris - Betty
Chrissy Harris - Reno
Jacky Carbin - Soda
Robyn Fargher – Wyn

Versatility Novice Silver

Robyn Fargher - Astro

Versatility Advanced – on Challenge courses

Chrissy Harris - Lace
Chrissy Harris - Betty

The Annual NALA results for 1 April 2022 to 31 March 2023 also saw some extremely good individual results for the period.

Rally-O – Standard

Chrissy Harris - Betty – 6th
Chrissy Harris - Lace – 15th

Rally-O – Challenge

Chrissy Harris – Lace – 3rd
Chrissy Harris – Betty – 7th

Email me at rfargherk9s@gmail.com if you wish to be added to our Rally-O email list.

Canine Good Citizen Report by Karen Burnham

Canine Good Citizen (CGC) is about teaching good manners to dogs and responsible ownership to their owners. We have a curriculum from NZ Dogs for each stage which there are four, they are Foundation, Bronze, Silver and Gold.

Each of these stages have assessments that require dog and handler to show competence for a pass.

We meet for training on Wednesday evenings during term time starting at 5.45pm, where we practice exercises from the CGC training manual. Our group starts off with an on lead walk, lately it has been in a busy retail area, during this time we can cover a few exercises from the manual, our dogs are very used to these busy settings, well behaved, and enjoy being together on these walks, as do the handlers. We then find somewhere away from the hustle and bustle of the public to complete other exercises. We also ensure that handlers that have specific exercises that they would like to practice in the group setting are met.

With winter and the illnesses that go with it are now behind us, we are looking forward to

longer daylight hours where we will be able to get out and about in other different locations.

We are going to be joining the Napier Club for CGC Assessments in the new year, the date is yet to be confirmed.

Flygility Report by Chrissy Harris

Our hardy group of flygility members had a good year with NALA being very consistent. Our smallest team member Taku got third overall in the small dogs in the Challenge and 7th overall - big and small dogs! Lace was 3rd in the 500s in the challenge and 9th overall.

In the standard fly Betty was 2nd in the 500s and was 3rd overall. Chester came in at 16th overall. The team was right up in the reckoning too.

We are looking forward to seeing our team of Lace, Taku, and Betty racing at NZDAC on Labour weekend.

Flygility is a fun sport for the dogs, they love being able to run and fetch balls. If you have a dog that loves to run and jump and play with balls this may be the sport for you! Size is no problem as the dogs jump according to their height.

Get in touch if you would like to know more.

Here's a wee story that you may find funny and it may possibly remind you of your own unwelcome experiences!

The other day I was at the local public park (not a dog park, but dogs are allowed there). We were walking along in a high movement area, so I had my dog on a leash. Another dog, off leash, sees us and starts approaching.

My dog needs her space so we started moving away, but the dog got to us before we could leave. My dog was stressing a little, so I politely said to the woman, sorry my dog doesn't want to play and ushered her dog away. Her dog gets the message and moves on. Quite good, right? Here comes the juicy part.

As I'm leaving the owner comes to me with a speech more or less like this:

Hey, if your dog is nervous and doesn't even want to play with other dogs, go somewhere else! Don't come to the park and ruin other dogs fun.

I heard this and a wave of fury started taking over, but suddenly I think I had a lightbulb moment and switched gears completely.

With the biggest, friendliest smile, I opened my arms as wide as I could and said Ohhhhh! Come here... I want to give you a BIG hug!

With panic in her eyes, she backs up, speechless and quickly starts walking away.

I said "Hey, don't run, I'm so friendly, come on, I only want to give you a hug! I'm friendly, I promise... I just want to Hug You!"

Still speechless and backing away with terror now, I said "Wait. You don't want my friendly hug?"

She yelled - No!

I said "Well neither does my dog! Have a nice day.!!!"

As I walked away, I saw her just standing there, speechless and she was leashing her dog!

I think I'll try this approach more often!

Thank you, Lorraine, for sharing this article with us.

Vet Report –
Nicky Chadwick
(Animal Care 2002 Ltd)

Disk disease in dogs or IVDD (Intervertebral Disk Disease)

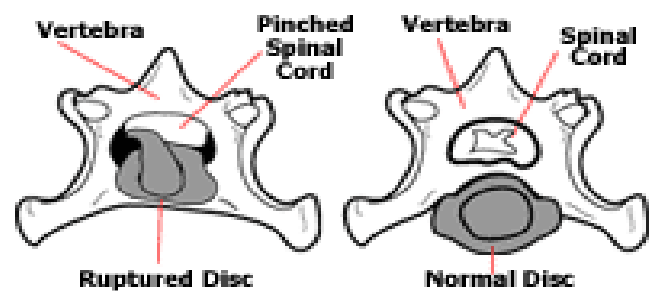

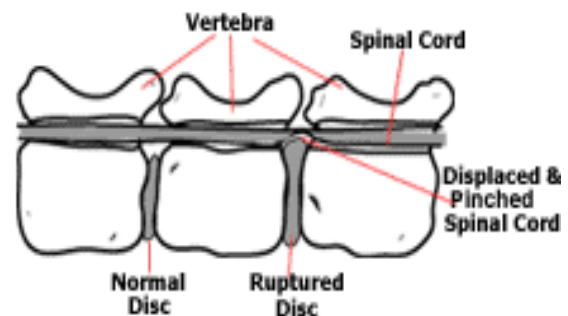

Introduction

The back is made up of numerous small bones called vertebrae, starting from the neck to the tip of the tail. These vertebrae are connected together by intervertebral disks. These disks are a pad of fibrous tissue with a central gel like substance which acts as a shock absorber, and also allows movement of the spine. Within the bony vertebrae is a central tunnel, through which the spinal cord runs, to protect it from damage. Between the vertebrae the spinal cord runs over the top of the disks. The spinal cord contains lots of bundles of nerves that relay messages back and forward to the rest of the body from the brain.

Causes

With age, and wear and tear, the disks start to degenerate. The outer fibrous portion may start to fray and weaken so that the central gel like part of the disk can protrude upwards

and put pressure on the spinal cord, or nerve roots leaving the spinal cord. This can either happen acutely, where the disk can suddenly rupture and hit the spinal cord with the force of a gunshot, or more slowly, causing small amounts of pressure on the spinal cord. The acute form is seen more commonly in certain breeds of dogs with a genetic weakness to their disks and can happen at a young age. These include Dachshunds, Corgis, Basset Hounds, Shih Tzu's and Beagles. Disk protrusion can happen after an episode of known trauma, such as jumping down, but can also happen spontaneously as the disk is already weakened.

Symptoms

Symptoms depend on the severity of the disk protrusion and the force that it hits the spinal cord. It also depends on the location of the disk injury. Initially it can cause intense pain.

Symptoms include;

- Reluctance to jump, stand up or move.
- Yelping when moving or pain when touched in an affected area.
- Arching their back or tensing their abdomen (with lumbar/lower back injury) or a stiff gait.
- Unwilling to move the neck or holding the neck lower (with neck injury).
- Scuffing toes, dragging the hind limbs or all four limbs, or weakness of the limbs.
- Paralysis - unable to stand and support their weight, either just the hind limbs or all four limbs depending on the location of the disk protrusion.
- Organ dysfunction e.g., unable to urinate, defaecate.
- Loss of any pain sensation behind the location of the disk injury

Diagnosis

Your vet may suspect a disk injury based on clinical signs and physical examination of your dog – especially if he/she is one of the predisposed breeds e.g., Dachshund. Your vet will try to determine the location of the pain and also do a full neurological exam to check for signs of spinal cord damage. Further diagnostic testing may then be warranted. Initially your vet may need to take an x-ray of your dog's spine. This may be useful to rule out other causes of back pain or spinal injury, such as a fracture, tumour, or possible infection. Unfortunately, a plain x-ray is often not very helpful to check for a disk protrusion, as the spinal cord and the disk do not show up (only bone can be seen). Sometime though, the disk space may be narrowed as the disk material has moved upwards into the spinal canal, or there may be evidence of calcification in a damaged disk. However, if it is important to find out which disk is affected, then more specialised diagnostic techniques are required. These need to be performed at referral centres by veterinary specialists and include a CT scan or an MRI scan. Occasionally Myelography is performed where radiographic dye is injected around the spinal cord highlighting the areas of spinal cord compression – but usually CT is the

preferred initial diagnostic technique nowadays.

Treatment

Medical (non-surgical) treatment may be the best option if your dog is only showing mild symptoms. Anti-inflammatory drugs are often used to reduce swelling around the spinal cord or nerve roots and they also help to reduce pain. If additional pain relief is needed then opiates drugs, gabapentin for nerve pain, paracetamol or other prescription drugs may be required. It is also really important to rest your dog which helps to decrease inflammation and prevent the disk protruding any further. Your dog may require strict cage confinement for up to 6 weeks.

If your dog has recurrent episodes of back pain, severe pain, or signs of spinal cord compression, then surgery may be the best option. With severe signs your dog will need surgery ASAP to prevent permanent irreversible damage to the spinal cord. This requires referral to a specialist surgeon. After determining the disk involved, the surgeon will either remove the degenerate centre of the disk (fenestration) or perform

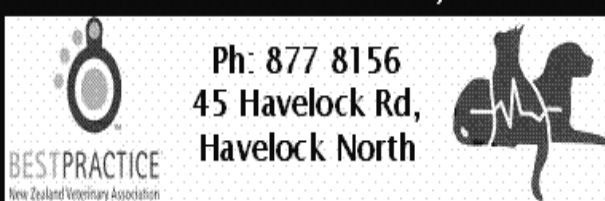

decompressive surgery (laminectomy). Laminectomies involve removing a portion of the vertebrae to expose the spinal canal so that the disk material can be removed, and to reduce pressure on the spinal cord. Strict rest with cage confinement is imperative to allow healing to occur.

Prognosis

With mild episodes of disk disease the prognosis for your dog with medication and rest is excellent. However, it is important to realise that the chance of the disease recurring is around 50%, especially if your dog is allowed to jump freely and if he/she is obese.

Dogs that have had surgery also have a good chance of recovery within 1-2 months and with strict rest. Some dogs may be left with some residual limb weakness but can still function well. However, if your dog has had complete paralysis for several days or has no pain sensation in their limbs, then the prognosis for recovery is very poor.

IMPORTANT HEALTH AND SAFETY NOTICE

Racecourse Management has asked me to remind our members about how their health and safety requirements affect our Club.

The racecourse is a work place so there are potential hazards to be aware of namely tractors, vehicles and racehorses. Because of this the Management have asked that we observe the following rules

- **NO dogs or people** on the course or in the Grandstand before 11am - as this is the time when there are horses in training.
- **All dogs** on leads during working hours (11am to 5pm) because there are people and tractors working during these hours.

The Management has no problem with Club members exercising their dogs off lead after 5pm before class but asks for consideration if there are tractors working - no one wants dogs or people injured.

Always pick up after your dogs and don't forget to take it away with you we don't have a bin service!

We are lucky to have this area to exercise our dogs - please respect it.

AGILITY AWARDS

Chrissy Harris & Betty

Jumpers Champion

- 18 March 2023

Dee Ockey & Ruby

Jumpers Grand Champion

– 22 April 2023

AGILITY NOTICES

EQUIPMENT AND TRAINING

Just a reminder to everyone to make sure you assist with getting the agility equipment out and putting in away. Best way to ensure you do remember is to arrive for your class 15 minutes before it's due to start i.e. 5 pm for 5.15pm for Foundation; and so on. And though we all want to get home - just check before you leave what needs to be put away or moved.

GEAR BOOK

So we can keep track of the gear, there is a Gear Book hanging up on the notice board, it must be completed by any **Agility** member who wishes to borrow equipment. The gear is not available to non-agility members.

Maximum loan time - two weeks.

It must be dated, have the name of person borrowing the equipment, the equipment borrowed, signed by borrower and countersigned by a committee member or instructor. Note on occasion it may not be possible to borrow gear as it may be required by us or another club - please don't be offended if your request is refused.

RECOVERY

DOGGY DAY-CARE

KEEP YOUR DOG HAPPY THROUGHOUT THEIR RECOVERY

\$45 per day / Mon-Fri 8:30AM-5:00PM

Throughout the day our team will take care of your dog, and all of their treatment needs. Services include administering medication, performing basic rehabilitation therapies such as soft tissue massage, passive range of motion, going for short-leash walks, and supervised crate rest! our team are here to help!
We also offer myofascial release, and hydrotherapy treatment options where appropriate.
